

## Rink with a new training concept

We from RINK are increasingly being asked about training courses that are independent of the commissioning of the machine. This includes requests for face-to-face as well as online events.

Online training courses in particular can be a cost-effective way for our international customers to refresh the knowledge of their employees or to familiarize new employees with the functions of the machines and to discuss maintenance issues.

For this reason we have developed a new concept that is divided into **3 modules** and is as follows:

BASIC	ADVANCED	PROFESSIONAL
<b>Target group:</b> Operator Basic knowledge for maintenance personnel & Electronics technician	<b>Target group:</b> Maintenance	<b>Target group:</b> Electronics technician
<b>Topics:</b> Function of the machine, security, service, inspection, etc.	<b>Topics:</b> Continuing mechanical malfunctions, sensors, etc.	<b>Topics:</b> electrical construction, program / Control structure, and much more.
<b>Costs per module (4h): €675</b> plus VAT + optional additional costs such as training material/expenses		

### DO YOU NEED TRAINING OR MORE INFORMATION?

Then please contact Birgit Stahl: **+49 (0) 2732 – 8946-11** | [b.stahl@rink.de](mailto:b.stahl@rink.de) or visit us at our booth at Drinktec 2022.

 **RINK** *Machines for the beverage industry*

### Coca-Cola FEMSA

Coca-Cola FEMSA, S.A.B. de C.V., known as Coca-Cola FEMSA or KOF, is a Mexican multinational beverage company headquartered in Mexico City. Coca-Cola FEMSA began as a joint venture with The Coca-Cola Company in 1991. They expanded and acquired Panamerican Beverages (Panamco), Coca-Cola bottlers with operations in Central America, Colombia, Venezuela and Brazil.

In 2015, Coca-Cola FEMSA opened two US\$500 million bottling plants in Itabirito, Brazil and Tocancipa, Colombia. The company completed its \$1 billion acquisition of VONPAR in Brazil in 2016.

In 2018, Coca-Cola FEMSA acquired the Guatemalan bottlers ABASA and Los Volcanes as well as MONRESA in Uruguay.

Coca-Cola FEMSA is one of the largest bottlers and producers of non-alcoholic

beverages in Latin America. The company is one of the world's largest bottlers of Coca-Cola. The product portfolio includes soft drinks, water, sports and energy drinks, fruit juices, milk drinks, coffee and packaged fruits and vegetables.

In January 2021, Coca-Cola Mexico asked for a **RK 940 rotary decrowner** bid for their Alcorta site in Buenos Aires, Argentina. After skilful negotiations by the **RINK** managing director, Dr. Bäcker, this machine was then sold there in May 2021.

## OeTTINGER. Always an Original

The roots of **OeTTINGER Brauerei GmbH**, based in Oettingen, Bavaria, go way back to 1731. Today, measured by output, OeTTINGER is one of the largest beer brands in Germany and among the top 25 most influential breweries worldwide.

Every year, OeTTINGER fills around eight million hectoliters of beer, mixed beer drinks and soft drinks into around two billion bottles and cans. More than 1,000 employees work at the four brewery sites in Oettingen, Gotha, Mönchenglöblich and Braunschweig as well as in the distribution center in Walldorf. The OeTTINGER brewery is still

a family-run company. Over the centuries, however, the company has developed from being a pure beer brewer to a flexible and multifaceted beverage manufacturer.

We brew and mix more than 40 different drinks under our main brand OeTTINGER. In particular, OeTTINGER sells our top-selling varieties of Pils, Export and wheat beer in over 100 countries. For our consistently high performance and long-term product quality, the company has received more than 300 national and international awards since 1980 alone.

The OeTTINGER brewery already owns

two **RK 940 rotary decrowner**, one **KM 690/12K decapper** and one **KM 790/9K combined decapper/decrowner** from **RINK**. Company KRONES delivered a new combined decapping/decapping device **KM 790/9K** this year.

by name. They are mostly family businesses, with an average of 46 dairy cows that have been supplying Schwarzwaldmilch for generations and have been the cooperative owners of Schwarzwaldmilch from the start. With their traditional agriculture, the Black Forest dairy farmers ensure that the beauty of this centuries-old Black Forest cultural landscape with its variety of meadows, pastures and forests is preserved. This year Schwarzwaldmilch installed a **single decapper ESR 08** from the company **RINK** in Freiburg.

## Gratzl Getränke GesmbH

We are a family business in the Lower Austrian district of Tulln, which is now being run by the third generation. The beginnings of the company go back to 1934, when Ludwig Gratzl decided to produce redcurrant wine after a particularly profitable redcurrant harvest.

In 1971 Rudolf Gratzl took over the business and was able to continuously expand the company over the following years and develop it into a model company. Since 2006, Stefan Gratzl has been in charge of the business affairs of the „LUGUS“ company and, like previous generations, can rely on broad family support and the active commitment of his long-standing employees.

We produce and sell drinks for the food trade, the drinks trade and the catering trade, but private individuals are also welcome in our in-house drinks shop. On an area of around 14,000m<sup>2</sup>, we produce more than 16 million liters of mainly non-alcoholic beverages such as Frucade®, Gröbi® and Almdudler®. We produce and sell fruit juices,

lemonades and soda water under our own brand LUGUS. The drinks are bottled both in environmentally friendly returnable glass containers and in practical non-returnable PET bottles.

An important factor for the constant success of our company is our clear commitment to investment and innovation. Thorough ongoing renewal, we manage to meet customer demands and survive in economic competition. Modernization of our filling systems, packaging machines and impro-

vements in the manufacturing process correspond to our guiding principle of working in an energy-efficient and resource-saving manner. For this reason we have decided in 2021 to introduce a new **decapper/decorker KM 790/2K** ordered from **RINK**.
